

VENUS: THE HOT & CLOUDY PLANET

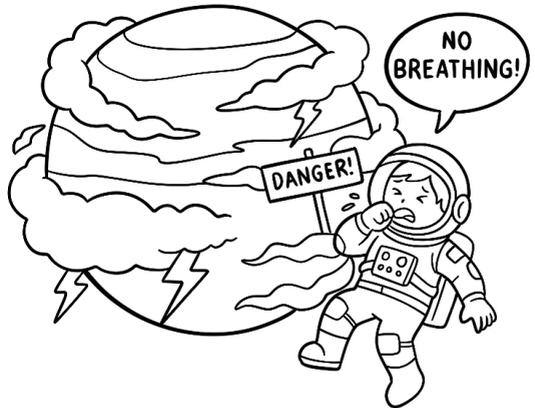

HOTTEST PLANET

VERY HOT
(880°F)!

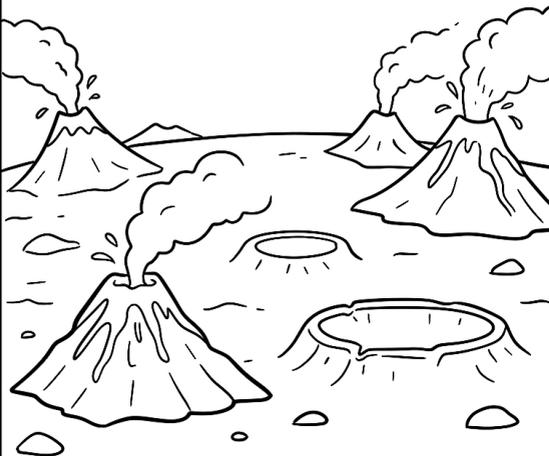

Its thick air traps heat,
making it hotter than an oven!

THICK, TOXIC CLOUDS

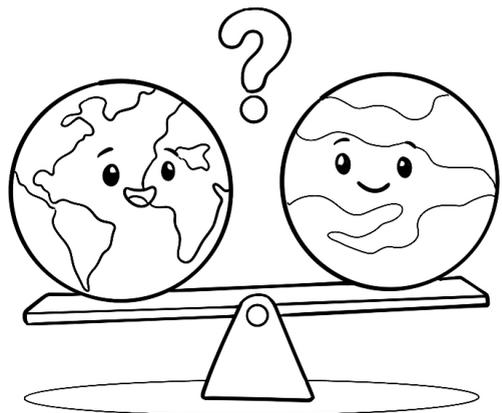

Covered in thick, poisonous
clouds that smell like rotten eggs!

VOLCANOES & CRATERS

Its ground has many old
volcanoes and large, flat craters!

EARTH'S TWIN?

It's almost the same size as
Earth, but it spins backwards!
